Pamela --

"In the water pits there were serpents, frogs, and even rats that had died inside. There is no other source for water!"

Our goal of providing clean water for 800 families is 75% complete!

You can help hit that target.

[Give the gift of life for children and families!](#)

Clean water is something no one can live without!

Join us. Spread the word. Make a donation. 100% of your gift will directly fund water filters.

GIVE TODAY

Fidela has two children and lives with her family in a small village in Africa.

"I knew that the water was making my children sick. We wash and drink from the same river. I felt so helpless as I saw my children with skin sores and so many stomach problems. I despaired for them."

"Then a team came from Bujumbura who placed a water filter in my home that I also share with my neighbors. I am so amazed that I can now provide clean water for my family. My precious children are no longer sick and their skin is clear. How I praise God for this."

"This team also taught me and my husband to make disciples for Christ. We have recently baptized thirteen new believers and continue to start new groups and house churches. God has blessed us and we must reach out and be a blessing to others!"

The results were immediate and dramatic for her children's health. She also listened to them share a message about hope and the love of God and began meeting with a neighbor's house church. She feels like a new person, inside and out, and has begun sharing this Gospel with others.

Now is a critical time

Communities are waiting for filters where the need is great! The time is now to reach this strife-torn nation with hope, peace, and the Gospel! Your partnership is critical!

Give hope and health with us today as God leads!

Much Love,
Roger & Brooks
