Bats, spiders, black cats, and owls—can you imagine a spooky Halloween without them?

Though they may give you goosebumps on the year's most frightful night, these animals actually help keep us and our planet healthy and safe. From the snowy Arctic regions to the Amazon rain forest, WWF works to protect landscapes where these important animals live.

Why these 4 species aren't scary ▶

You can also share ghoulish greetings with friends and family with our **wild Halloween ecards!**
